Microsoft Data Security Workshop

Microsoft

Strengthen governance, reduce risk, and protect sensitive information

Data is the lifeblood of your organisation - but the more it grows, the harder it becomes to manage, protect, and regulate. External threats, insider risks, and evolving compliance requirements mean that traditional approaches are no longer enough.

Delivered by TIEVA and fully funded by Microsoft, our Data Security Workshop helps you uncover risks, strengthen data governance, and put the right controls in place. Using Microsoft Purview, we'll show you how to secure information wherever it lives, reduce insider risk, and simplify compliance across your business.

From Risk to Resilience: A Smarter Approach to Security.

The workshop helps your organisation:

- Pinpoint where sensitive information lives and how it's being used

- Detect and mitigate insider risks before they cause damage

- Assess your compliance posture and identify gaps

- Gain actionable insights with Microsoft Purview

- Build a clear roadmap to improve data governance

Workshop Overview

The Data Security Workshop follows a proven framework to deliver practical outcomes for your business:

- **Discovery:** Understand your risk landscape and priorities

- **Risk Assessment:** Evaluate data exposure and compliance posture

- **Technology Demonstration:** See how Microsoft's data protection tools apply in real-world scenarios

- **Review & Next Steps:** Receive tailored guidance and an action plan governance

Microsoft Data Security Workshop

Microsoft

What You'll Receive

▶ **Security Check Report –**
a snapshot of current risks and exposures

▶ **Data Insights –**
visibility into how sensitive information is created, stored, and shared

▶ **Insider Risk Analysis –**
potential risks from within your organisation

▶ **Strategic Roadmap –**
a prioritised plan for governance and compliance.

▶ **Actionable Recommendations –**
clear next steps tailored to your needs

Why TIEVA?

As a Microsoft Solutions Partner for Security, TIEVA brings together technical expertise and business-focused outcomes. Our team has extensive experience helping organisations improve data governance, reduce risk, and simplify compliance with Microsoft technologies.

By working with TIEVA, you'll benefit from deep expertise in Microsoft Purview and Defender, combined with practical insights from experienced data security specialists. Our recommendations are always shaped around your unique regulatory and business priorities, and because the workshop is fully funded by Microsoft, you can explore new ways to strengthen governance and reduce risk at no cost to your organisation.
