

Microsoft Modern SecOps Workshop

Strengthen your Security Operations with Clarity, Insight, and Assurance

Security operations can't afford to stand still. Threats are evolving faster than ever, and outdated approaches simply don't provide the visibility and speed today's organisations need. Our Modern SecOps Workshop helps you uncover risks, streamline operations, and strengthen resilience.

Delivered by TIEVA and fully funded by Microsoft, this hands-on workshop takes you inside Microsoft Sentinel to show how modern, cloud-native security operations can give you the clarity, automation, and agility required to stay ahead of threats.

Why Modern SecOps?

The workshop helps your organisation:

- Gain unified visibility of threats across your environment
- Automate detection and response to speed up investigations
- Optimise SOC performance with clear success metrics
- Strengthen compliance and risk management through modernised processes
- Build a roadmap for sustainable, scalable security operations

Workshop Overview

The Modern SecOps Workshop takes a structured approach designed to give you clarity and confidence in your security operations:

- **Discovery:** Understand your security goals and priorities
- **Threat Exploration:** Uncover threats in your environment
- **Hands-On Modular Labs:** Explore Microsoft Sentinel's capabilities in action
- **Recommendations & Roadmap:** Receive tailored guidance and next steps

Microsoft Modern SecOps Workshop

Deliverables

At the end of your workshop, you'll receive:

- **Threat Visibility Report:** A clear view of active risks and vulnerabilities within your environment.
- **SIEM Modernisation Strategy:** Tailored recommendations for moving from legacy SIEMs to modern SecOps platforms.
- **Hands-On Product Experience:** Practical exposure to Microsoft tools so your team can see how they work in real scenarios.
- **Deployment Readiness Plan:** A roadmap outlining the steps needed to implement changes effectively.
- **Automation Guidance:** Advice on how to use automation to speed up detection and response, reducing manual workload.

Why TIEVA?

As a trusted Microsoft Solutions Partner for Security, TIEVA combines deep technical knowledge with a clear focus on business outcomes. Our team has years of real-world experience helping organisations modernise their operations, reduce risk, and align IT strategies with business goals.

By working with TIEVA, you'll gain the benefit of proven expertise in Microsoft technologies, combined with practical guidance from experienced security practitioners. Our recommendations are always tailored to your business priorities, and with the workshop fully funded by Microsoft, you can explore new possibilities at no cost to you.
