

Microsoft Threat Protection Workshop

Uncover vulnerabilities, prioritise risks, and strengthen your defences

The shift to cloud-first infrastructure has brought incredible flexibility and scale - but also new risks. From phishing and ransomware to insider threats and identity-based attacks, the threat landscape is evolving faster than ever. Traditional security measures alone can't keep up.

Delivered by TIEVA's expert team of cloud consultants and fully funded by Microsoft, our Threat Protection Workshop helps you uncover vulnerabilities, evaluate your current security posture, and develop a clear strategy to stay ahead of attackers. Using Microsoft 365 Defender, we'll show you how to strengthen your protection across identities, endpoints, applications, and data.

From Blind Spots to Actionable Insights

The workshop helps your organisation:

- Gain visibility into threats actively targeting your environment
- Define and prioritise your security objectives
- Map risks to Microsoft 365 Defender's protection capabilities
- Build a roadmap to accelerate measurable improvements

Workshop Overview

The Threat Protection Workshop follows a structured, hands-on approach to deliver practical outcomes:

- **Discovery & Alignment:**
Understand your security goals and priorities
- **Threat & Vulnerability Analysis:**
Uncover risks across cloud and on-premises environments
- **Microsoft 365 Defender Demonstration:**
Explore how Microsoft tools mitigate real-world threats
- **Recommendations & Roadmap:**
Receive tailored guidance to strengthen protection

Microsoft Threat Protection Workshop

Deliverables

At the end of your workshop, you'll receive:

- **Threat Analysis Report:**
Visibility into the active risks facing your organisation
- **Microsoft 365 & On-Premises Visibility:**
Insight into vulnerabilities across hybrid environments
- **Stakeholder Security Summary:**
Clear findings for technical and business leaders
- **Actionable Recommendations:**
Prioritised steps to reduce your risk exposure
- **Strategic Roadmap:**
A clear plan to accelerate your security improvements

Why TIEVA?

As a Microsoft Solutions Partner for Security, TIEVA combines technical expertise with a clear focus on business outcomes. Our team has deep experience helping organisations strengthen their defences against today's most advanced threats, blending hands-on security operations knowledge with specialist Microsoft skills.

By working with TIEVA, you'll benefit from clear visibility into the threats facing your organisation, practical insights from experienced SOC practitioners, and tailored recommendations aligned with your security strategy. And with the workshop fully funded by Microsoft, you can take action to protect your business at no cost to you.
